## 1. Your current accessibility / risk snapshot

Overall accessibility and risk score

**Your current accessibility & risk rating score: 81/100 (FAIL)**

It appears your website needs a bit of work to reach accessibility, but don't worry you're not alone. Countless other districts are in the same boat. The most important thing to do is set up a plan to reach compliance.

**Why is 100% compliance critical?**

- More than **2,403 districts** have been affected by an accessibility action. About 6% of all districts in the US, including county-dependent districts have been fined, received demand letters, or gotten Department of Justice Office of Civil Rights (OCR) letters for website ADA violations in the US. **That number is expected to exceed 4,000 (10%) by the end of 2024.**
- **The number of lawsuits rose 56% in 2021, and the penalties for noncompliance are rising fast** –averaging \$4,000 for an ADA claim in 2019 to \$39,000 in 2022. It's a situation that The Wall Street Journal calls "very perilous" in a [recent article](#).
- **Very few if any**, special district insurance policies even partially cover the costs of web accessibility issues.

## 2. Top accessibility issues found on your site

Accessibility issues come in all shapes and sizes. Some are more obvious to the naked eye like "color contrast issues". However, others are more structural in nature and related to the code that's on your site. These types of issues affect how screen readers interpret your content. Here's what we found on your site:

Your accessibility issues	Total
 <a href="#">List items ( <code>&lt;li&gt;</code> ) are not contained within <code>&lt;ul&gt;</code> , <code>&lt;ol&gt;</code> or <code>&lt;menu&gt;</code> parent elements.</a>	32
 <a href="#">Heading elements are not in a sequentially-descending order</a>	11
 <a href="#">Background and foreground colors do not have a sufficient contrast ratio.</a>	10
 <a href="#">Lists do not contain only <code>&lt;li&gt;</code> elements and script supporting elements ( <code>&lt;script&gt;</code> and <code>&lt;template&gt;</code> ).</a>	9
 <a href="#">Links rely on color to be distinguishable.</a>	4
 <a href="#">Identical links do not have the same purpose.</a>	1

How to fix these issues

## 3. Pages that need to be fixed

The following pages on your site require remediation to become ADA compliant. We recommend using Google Analytics to discover which of these pages currently receive the most web traffic and starting there.

## 4. Your timeline to reach accessibility

Obviously, **timeline is the big question**. While we don't know all the ins and outs of your organization or tech stack, we do know the major factors that can affect the timeline of your accessibility plan. We've laid out the known factors and a couple of scenarios below that would get you back to compliance and away from risk.

### Factors for your timeline

Factor 1: Your CMS	Netlify
Factor 2: The type of errors on your site	Structural + Presentational
Factor 3: The volume of errors on your site	67
Factor 4: The amount of time your staff has available to work on remediation	Unknown

#### Estimated Remediation Scenarios

#### Option 1: Do it yourself

 Between 45 - 90 days of hands-on remediation.

Plan for dedicated developer and staff time each week.

#### Option 2: Hire a remediation service

 Custom quote required for timeline.

Plan for an in-depth audit, a full website remediation project, and ongoing fees (in addition to current website and hosting).

#### Option 3: Use an accessible-first website platform

 Our special district website partner [Streamline](#) will convert your site to a fully-compliant platform for you.

Plan for 1 hour of staff training. Includes ongoing accessibility, state compliance tools, indemnification against ADA claims, and unlimited support.
